PROFESSIONAL SUMMARY

BCA student with a strong academic record (Overall CGPA 9.4/10, latest semester SGPA 9.62/10) and hands-on experience building Python and web development projects, including a smart student management system, a washroom hygiene monitoring system, a weather forecasting application, and an e-commerce website. Skilled in Python, Java, C++, HTML, CSS, Flutter, PHP, DBMS, and foundational data structures, AI, and ML concepts, with strong communication, project management, and debugging abilities. Demonstrated leadership as a club lead and event organizer, and eager to contribute as a Python Developer, Web Development, or IT Support intern.

EDUCATION

Bachelor of Computer Applications (BCA)

Expected Graduation: 2027

GSSS SSFGC College, Mysuru, Karnataka

Overall CGPA: 9.4 / 10 | Latest Semester SGPA: 9.62 / 10

TECHNICAL SKILLS

- Programming Languages: Python, Java, C++
- Web & App Development: HTML, CSS, Flutter, PHP
- Database Management: DBMS fundamentals
- Data Analysis: Foundational data analysis skills, currently building proficiency in Power BI
- Core Concepts: Data Structures (basics), Artificial Intelligence & Machine Learning (basics)
- GUI Development: Building graphical user interfaces for desktop applications
- Data Visualization: Presenting data through interactive charts and dashboards
- Debugging: Experienced in identifying, tracing, and resolving bugs across Python and web projects using systematic testing and code review

PROFESSIONAL & SOFT SKILLS

- Communication: Strong verbal and written communication skills, developed through club coordination, team presentations, and cross-functional collaboration
- Leadership: Proven ability to lead teams and initiatives, demonstrated as Club Lead and event organizer
- Project Management: Skilled in planning, prioritizing tasks, and coordinating timelines to deliver projects such as the smart student management system and e-commerce website on schedule
- Event Management: Experience organizing and hosting IT club events and a junior orientation program
- Debugging & Problem-Solving: Methodical approach to troubleshooting code issues and optimizing application performance

PROJECTS

Smart Student Management System *Python*

- Upgraded the earlier student management system with a graphical user interface (GUI) and server connectivity for centralized data access
- Added interactive charts to visualize student records and performance data
- Implemented add, update, search, and delete functionality with data synced to a connected server

Washroom Hygiene Monitoring System *Flutter, PHP*

- Built a mobile application using Flutter with a PHP backend to monitor and improve washroom hygiene on campus
- Integrated scanner-based check-ins to track cleaning schedules and washroom status
- Developed a complaint registration feature allowing users to report hygiene issues in real time
- Implemented voice alerts to notify housekeeping staff of pending tasks or reported complaints

Weather Forecasting System *Python*

- Developed a Python application that fetches and displays weather forecast data for user-specified locations
- Implemented logic to process and present weather data in a clear, user-friendly format

E-Commerce Website *Python, HTML, CSS*

- Created a functional e-commerce website with product listing and browsing features using HTML and CSS for the front end
- Integrated Python for back-end logic to support core website functionality

CERTIFICATIONS & BADGES

- Microsoft Badges (certification badges earned through Microsoft learning programs)
- Discover Data Analysis Badge
- Python Internship Certificate
- Basics of Data Structures Certificate
- Currently building proficiency in Power BI

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Served as Club Lead, organizing technical club activities and coordinating team initiatives
- Organized IT club events as part of the core organizing team
- Hosted IT events at college as an event host/organizer
- Organized an orientation program for junior students
